Webcam driver for HP Webcam Business Edition Wb918la, QuickCam Orbit AF

[Intel](#), world-wide leader in silicon innovation and technology development, has added one more webcam to its portfolio, HP Webcam Business Edition Wb918la.

Features and Performance

This webcam is suitable for meeting or teleconferencing applications. The camera is designed for simple setup and provides an easy-to-use interface to integrate into large conference rooms with ease. It is based on the Intel® RealSense™ Technology (INTEL_RS3601X_SEN2020A_W10) that offers users exceptional performance, allowing for remote video collaboration, multi-person conferencing, 3D scanning of objects and environments. The COBF (Continuous Optimization by Feedback) technology allows for fine tuning of image quality.

\tThis webcam also meets the most demanding video conferencing applications. \tThe webcam is equipped with two microphones for stereo sound, which, when combined with the included microphone pedestal, allows for 3D audio conferencing. Also included are a Kensington lock slot and space for an optional monitor.

\tWith two USB 2.0 ports in addition to the DVI-I connector, users can connect the webcam to multiple devices at once.

\tThe webcam comes complete with software and pilaster for easy setup.

\tThe webcam has a rugged, slim design that can be placed almost anywhere in the conference room for superior image quality. The rugged construction protects the webcam from bumps and scratches.

\tThe webcam is also equipped with an integrated indicator light to indicate if it is being used.
